

For City Use
Only:

Notice of Intent to Perform Fumigations

Please complete this form and FAX to the Long Beach Energy Utility Customer Services at (562) 570-7510 to request a gas meter shut off for fumigation. You will receive a faxed confirmation. We require a five working days notification (Monday - Friday = working days) in advance of your required shut off date. If we are not able to schedule the shut off on the date you indicate, the **shut off will be scheduled at the next possible date**, which may exceed five working days after the requested date. Meter turn on orders should be scheduled at the same time to ensure availability.

Applicant: _____ Contact Person: _____ Today's Date: _____
Business Ph. #: () _____ - _____ FAX #: () _____ - _____
Credit Card Number: _____ Expiration Date: _____ Authorized Signature: _____

If you are not prepared to schedule the turn on date, please inform our utility customer to call LBE Utility Customer Services at (562) 570-5700 to have gas service restored. 48-hour advance notice is required to restore gas service, and an adult at least 18 years old must be present for us to complete the turn on order. If the turn on can't be worked on the date indicated, the turn on order will be scheduled for the next available date. (The restore date must be at least a minimum of 24-hours after the tent has been removed.)

The applicant is responsible for ensuring the utility company has proper meter access to perform the shut-off. Inability to access the gas meter (e.g., locked gates, dogs, etc.) will delay the service call. If we go to the wrong address based on information supplied by the applicant, then the applicant will be liable for the entire cost. The number of meters or units at the address will be verified, and your credit card will be charged for any additional meters or units found over the original agreed upon number. If the fumigation request is canceled before Long Beach Energy completes the work, the fee will be refunded to you.

#	Customer Name	Address	Requested Meter Shut Off Date	Requested Meter Turn On Date	Total Number of Meters\Units to be Shut off
